

SCHEDA TECNICA

CENTRAL VACUUM UNIT CVS 125 S

IMPIANTI DI ASPIRAZIONE CENTRALIZZATI

The **CVS 125 S** (Central Vacuum System) unit of the **Depureco** range is a fixed suction unit for **centralized systems** of all kinds. Combined with a **filter unit** (DV-AIR), it has the purpose of powering a **large centralized system** with **numerous suction points**, even at different heights. The **CVS 125 S** is designed taking into account the **power required**, the type of **material to be vacuumed**, the distance of the pipes, the contemporaneity of the **suction vents**, and the various **customer needs**. It can be equipped with different engine sizes (**side-channel turbines**) depending on the **power required by the system**. The transport is facilitated thanks to two **through guides** provided on the bottom of the machine for **handling** by forklift. The **extractor** can be equipped with an **absolute H14 filter** as a support for the main filter unit. **Perfect solution** for any type of **large centralized system** that requires **several simultaneous suction points** or needs to transport large quantities of material.

POTENZA
12,5 kW

DATI TECNICI

MOTORE

Voltaggio	400V
Massimo vuoto	600mBar
Vuoto in continuo	530mBar
Massima portata d'aria	500m3/h
Frequenza	50/60Hz
