SWAN 150

INDUSTRIAL VACUUM CLEANER FOR FINE DUST

POWER
1,5 kW - 2 HP

APPLICATION
Toxic or hazardous dusts

CAPACITY
50Lt

FEATURES

- Extraction of fine dust in demanding environments such as the food and pharmaceutical industries
- GMP compliant
- Progressive multistage filtration available
- Compact and easy to maintain

HIGHLIGHTS

SUCTION UNIT

The suction unit is a side channel blower with direct coupling between motor and impeller. The turbine is equipped with a safety valve to ensure continuous, maintenance-free operation. A metal silencer is included as standard in the turbine to ensure a low noise level.

FILTER UNIT

The tangential inlet facilitates the cyclonic effect to deposit the collected material in the container. Filtration is ensured by a polyester star filter in class M (filtering efficiency 1 micron) with high filtering surface area, which guarantees air passage even with a dirty filter.

FILTER CLEANING SYSTEM

An ergonomic manual filter shaker allows the filter to be cleaned easily and quickly, removing dust and debris from the filter surface.

COLLECTION UNIT

The material is collected inside a large coated steel release container.
