# BL AM 3D Z22 INDUSTRIAL VACUUM FOR METALLIC DUST

Watch the video!

1,1 kW - 1,5 HP

APPLICATION
Combustible dusts

COLLECTION SYSTEM
Container with inertizing bath

## **FEATURES**

• Atex certified for use in Atex zone 22

- Container with inerting liquid bath that prevents the formation of explosive atmospheres inside the vacuum cleaner
- Ideal for safe suction of conductive metal dusts
- Safety valve included

## HIGHLIGHTS

#### **SUCTION UNIT**

The vacuum unit is a powerful Brushless motor, suitable for continuous work. Two filters are installed on the vacuum cleaner head: one to protect the motor and the other placed on the air outlet. The air that comes out is totally filtered

#### **FILTER UNIT**

Filtration is ensured by a Class M polyester cartridge filter (filtration efficiency 1 micron) with a high filtering surface area, which guarantees air passage even with a dirty filter.

#### **INERTING LIQUID BATH**

Container with conductive dust immersion system. Prevents the formation of explosive atmospheres inside the vacuum cleaner by neutralizing incoming dust.

## **SAFETY VALVE**

Safety valve that in case of reactions between powders and liquids inside the container lets out the released gases preventing explosions.
