

CENTRAL VACUUM SYSTEMS

# HF 30 S

## POWERFUL INDUSTRIAL VACUUM CLEANER WITH FIXED STRUCTURE

**POWER**  
20 kW - 28 HP

**APPLICATION**  
Powders, solids and  
shavings

**COLLECTION SYSTEM**  
Localized discharge

## FEATURES

- Powerful side channel blower
- Ideal for on-board machine applications
- Convenient manual filter shaker
- Multiple construction and material discharge options available

## HIGHLIGHTS

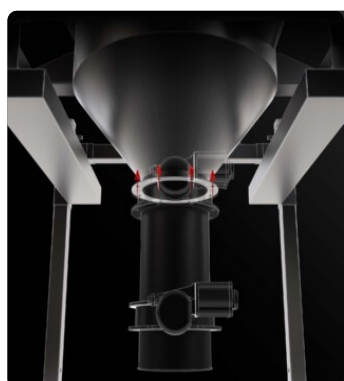

### SUCTION UNIT

The suction unit is a side channel blower with direct coupling between motor and impeller. The turbine is equipped with a safety valve to ensure continuous, maintenance-free work. A metal silencer is included as standard in the turbine to ensure a low noise level.

### FILTER UNIT

The tangential inlet facilitates the cyclonic effect to deposit the collected material in the container. Filtration is ensured by a polyester star filter in class M (filtering efficiency 1 micron) with high filtering surface area, which guarantees air passage even with a dirty filter.

### CUSTOM EXHAUST SYSTEM

A specific discharge system, intermittent or continuous, can be installed depending on operational needs.

### ELECTRICAL PANEL WITH REMOTE START

Management via electrical panel equipped with star/delta start and remote control. Implementable with additional functions
