The DustVac Ultra-Light Overhead Cleaning Kit has been designed to ensure maximum safety and versatility when vacuuming in potentially explosive environments. Built with conductive and advanced carbon fiber materials, this kit is exceptionally lightweight yet strong, helping operators clean pipes, walls, ceilings, and elevated flat surfaces with minimal effort.

Ideal for cleaning and removing dust, residues, and materials, it enables safe operations up to 6 meters high, without the need for ladders or lifting equipment.

Save time
on cleaning

Easily reach
high spots
